Description

Extended product overview

Accuratus Monster 2 Bluetooth & RF - Multi-device Bluetooth & RF Wireless Mixed Colour Upper Case Children's SEN Keyboard for Learning Meet the Monster2 Bluetooth & RF Multi-device range of oversized keyboards from Accuratus. Evolving from our hugely successful USB versions the Monster 2 Bluetooth & RF features Multi-device Bluetooth and RF 2.4GHz wireless connectivity meaning you can hot swap quickly between paired devices such as a PC, Mac and tablet or phone. For young children the Monster 2 Mix is the perfect entry into computing, with large oversized keys grouped in different colours making learning easy and fun. Then there's the High Visibility & High Contrast models, with high visibility large black legends against a bright yellow background, or large black legends on a high contrast white background. The perfect combinations for those with certain sight deficiencies. Maybe you just want a keyboard With big keys because they look cool, whatever the reason, these tough keyboards are precise and a joy to use. Designed to assist SEN users by using precise colour contrast ratios backed by RNIB research, the Monster keyboard is a brain-friendly alternative to regular, non-assistive keyboards. Our Monster 2 mixed colour keyboard has special dual font printing to ensure the correct contrast ratio for characters (black on yellow keys and white on other colour keys). If you feel this suits your needs you can also talk to your IASS advisor. If you qualify for disabled person VAT relief on purchases please contact us. Keyboard Features and Specifications
