Description

Extended product overview

The perfect short-throw projector is here with lifelike images in FHD at 3,500 lumens brightness. At just 1.1 meter you can create a 100-inch projection that can easily mirror media from your phone or PC without any cables or required apps. Protect yourself from eyestrain with LumiSense which adjusts brightness based on ambient external light and BlueLightShield which limits exposure to blue light. Short-throw Projection Place the projector at a short distance from the screen to still be able to see a bigger picture. For example if it is placed 90cm away from the screen it could get an 80" projection. FHD Resolution A 100" image of pure beauty in 1080p Full HD looks so real, you'll swear you're looking out the window. Wireless Projection Break free from the clutter of wires with easy wireless projection options and wireless dongle design. 3500 Lumens Brightness See crystal-clear, vibrant images from a distance in daylight or medium to large rooms with up to 3,500 lumens of brightness. Sports / Football Mode Gather your friends and share the glory of your favorite sport on an immense screen. Football mode enhances the colors to clearly show all the action. HDMI 3D Display Flat is out, 3D is in. Images on the screen seem to jump into your living room with HDMI 3D display support. Keystone Correction for Distortion Finding the right angle for your presentation is easier with keystone correction, which corrects horizontal and vertical distortion. Acer BlueLightShield™ Protect your eyes from unnecessary strain by utilising Acer BlueLightShield™ technology. ISFccc Professional Calibration Get the most out of your projector's images with professional calibration from an ISF-qualified technician.
