## Description

Extended product overview

Take your gaming to new horizons with the GD711's HDR10-capable LED projection in 4K UHD and go full speed in FHD at up to 240Hz on PC or choose from various modes that support variable refresh rate for both PC and next-gen consoles. Your game-ready home theatre has arrived. SEE IT ALL SO CLEARLY Say farewell to your TV and transform any space into a game haven with just the right amount of home theatre. We're confident that with up to a 4K UHD 300-inch screen (though we recommend 74 inches at 2 m) – that you'll want to see what else this projector is capable of. OH, THE COLORS! Whenever possible, always go for the Rec.709 colour gamut. This international HDTV standard guarantees accurate cinematic colour reproduction – exactly as the director intended. And, with our outstanding contrast ratio, HDR10 compatibility, and DynamicBlack™ Technology – you'll see just how far projectors have come in making that home theatre a reality. FAST IS THE ONLY WAY If you have the PC to feed the frames, then you can reach up to 240Hz in 1080p on PC via High Frame Rate mode or 120Hz in 1080p on the latest consoles with Variable Refresh Rate mode. Variable Refresh Rate keeps your gameplay seamless, tear-free and smooth. Visuals are improved by reducing or eliminating lag and/or judder through the use of syncing your display's refresh to the output of your console or PC. CHOOSE YOUR MODE Game Mode fine-tunes images for how you want to see your game. Enhance contrast and dark levels to either immerse yourself in the environment or spot enemies attempting to avoid your sight. An additional football mode also enhances the brightness, saturation, sharpness, and gamma in the bright scenes for especially vivid images. WIRELESS SMART PROJECTOR The Predator GD711 works with multiple audio-visual platforms to give you the best audio-visual experience and lets you easily connect to various apps with ease. Enjoying your favorite shows is made even easier with the option to connect wirelessly and the addition of the 10W speaker and antimicrobial remote. 10W SPEAKER Plenty of sound whether loading up a game or enjoying your latest show. ANTIMICROBIAL REMOTE Tested by ISO 22196:2011, the silver-ion antimicrobial agent has shown a consistent reduction rate in microbe buildup. DESIGNED TO DO MORE The Predator GD711 is designed to be easy to install, be used 24/7, and includes a number of features and technologies to reduce its carbon footprint and extend the lifespan of the projector. AUTO-KEystone Thanks to the automatic vertical keystone correction, the projector automatically compensates for trapezoidal distortion if the projector is not positioned correctly. 2D KEYSTONE This allows for minute adjustments to horizontal & vertical for the proper rectangular shape on both sides of the image. AC POWER ON With the AC Power On function, the projector is able to turn on automatically such as when turning on the power in the room it is in. HDMI POWER ON With the HDMI Power On function, the projector is able to turn on automatically when the projector receives a signal via HDMI or VGA. 24/7 USE Get non-stop projection with support for 24 hour-7 day continuous or prolonged use. COLORSAFE II Guarantees consistent, brilliant and natural colour projection throughout the life of the projector through the use of DLP® technology chip. DLP® LINK™ 3D 3D content can be transferred from suitable playback devices such as 3D Blu-ray players, 3D set-top boxes and 3D game consoles without the need for an additional PC. LED LAMP LIFE Use this projector as often as you like and for as long as you like; with a 30,000-hour lifetime, you won't be needing a replacement any time soon. WARRANTY Standard Warranty: 2 years
