Extended product overview

Futureproof Your Workspace with Laser Projection Technology Laser projection technology futureproofs your workspace sustainability. LH650 not only saves power and maintenance costs but its compact size and high brightness also ensure an efficient and uninterrupted meeting experience. No lamp replacement, no mercury. Eco-friendly production with fewer consumables. Compact and light (under 3kg), saving table space. 20,000-hr max laser lifetime (with Eco Mode). High brightness for brilliant images. Maximised Savings, Uncompromised Performance BenQ SmartEco technology adjusts light source power intelligently without sacrificing image quality, saving up to 70% more energy than traditional Eco Mode. Laser technology conserves energy an additional 23% compared to traditional mercury lamps, while the device dims itself to minimum power in just 1.5 seconds. Save Smartly SmartEco Mode adjusts light source power by intelligently adapting to the content without sacrificing image quality, delivering optimal performance. Save Instantly Press the Eco Blank button to turn off the image for a period of time, reducing light source power consumption by 70%. If no signal is detected for 3 minutes, the projector enters this mode automatically. Increase Energy Efficiency Auto Power-off powers down the device after 20 minutes of inactivity to save energy and minimise worry about leaving equipment on Brilliant Colours for Brilliant Ideas With laser technology that provides rich saturated colours and sharp lifelike imagery, LH650's 92% REC.709 colour gamut standard ensures each detail is conveyed with stunning accuracy. Deliver presentations that captivate. Unrivalled Clarity and Enduring Colour BenQ's pure glass lenses provide long-lasting image precision, while DLP technology ensures accurate and vibrant colours over time. With calibrated colour modes, your visuals will shine, illuminating your ideas with brilliance in every detail. Presentation Mode delivers eye-catching colours. Infographic Mode displays legible text and detailed imagery. Spreadsheet Mode displays reports in high contrast and clarity. Driver-Free Wireless Projection Make your BenQ LH650 projector wireless with the optional WiFi dongle. Share multimedia content, including photos, documents, and full HD videos from mobile devices or laptops without additional driver or software downloads. Start Presenting in a Snap Our projector eliminates those long awkward delays that happen when slower projectors power up. Simply turn it on and you're good to go, fast. Auto Turns On Auto Turns On automatically turns on the projector once the HDMI input signal is detected. 2D Keystone & Corner Fit Adjust your projector's angle and corners, regardless of its location, to achieve perfectly aligned presentations. Digital Shrink & Shift Resize and reposition your image without moving your projector for customisable and seamless viewing. Image Blanking The projector's Blanking feature allows you to eliminate unwanted image areas and maximise screen space for a cleaner and more professional presentation. Optimal Sound Quality The built-in 10W speaker ensures your presentations are loud and clear, eliminate poor audio quality and miscommunication. World-leading DLP Projectors Choose BenQ with confidence for all your projection needs. As the world's top-selling DLP projector brand for over 10 years, we deliver unparalleled performance, with the quality you deserve.
