Description

Extended product overview

Set in a slim bezel, the iiyama LH4341UHS is a professional digital signage display offering 24/7 operating time in portrait and landscape orientation. This 500cd/m² high brightness IPS panel with 4K UHD resolution (3840x2160) provides exceptional colour and image performance. With the built-in media player you can play your favourite music and show your most beautiful videos, photos and images directly on screen. IPS displays are best known for wide viewing angles and natural, highly accurate colours. They are especially suited for colour-critical applications. 4K UHD resolution (3840x2160), better known as 4K, offers a gigantic viewable area with 4 times more information and work space than a Full HD screen. Due to the high DPI (dots per inch), it displays an incredibly sharp and crisp image. 24/7 displays are designed for a continuous operation. Media player (in pivot not supported) Play your favourite music and show your most beautiful videos, photos and images directly on screen from a flash drive or internal memory with the built-in media player.
