Description

Extended product overview

43" 4K UHD Professional Digital Signage 24/7 display featuring Android OS, FailOver and Intel SDM slot Choose non-stop high performance and reliability with the ideal all-in-one signage solution for mission critical environments. The LH4375UHS from iiyama can be operated in landscape or portrait orientation in continual around the clock environments, 24/7 without any interruption. Its versatility can be adapted to your industrys display needs. On-board Android 11 OS means you can easily customize the display to your needs and install applications directly to it. The on-board iiSignage (Content Management System) gives you total control of your messaging and advertising remotely and safely. The SDM Slot provides embedded PC option for total flexibility, security and control, while the FailOver feature ensures your content is always actively displayed through your choice of inputs. The built-in (and removable) WiFi module means this series is ready for remote content delivery using your network. Now the display is also offering DP-Out from any input. With iiControl (DMS), iiShare and the integrated EShare app (wireless screen sharing) you bring effortless ideation and efficient collaboration in your enterprise or school. You can start sharing wirelessly easier than ever before. Android OS Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it. iiSignage iiSignage is our digital signage content management platform to easily show and control your content and to manage your displays in a secure way. The Content Management System (CMS) gives you total control of your messaging and advertising remotely and safely. Signal FailOver FailOver is a feature which automatically detects input sources. When there is no signal on the default input it will automatically switch to the next available input. FailOver allows customers to prioritize a number of inputs (incl. Browser, Media Player and Custom) and ensures your content is always actively displayed, assuring active content at all times. Smart Display Module A Smart Display Module (Small/Large) is a plug-in module which can easily be inserted into the most stylish and ultra-slim displays. This small sized module delivers great performance with minimum implementation and management. Available as optional. Flexible Orientation With the option to switch between landscape and portrait mode, these displays let you get creative with any space. Whether its messaging, ads, videos, or safety info, you can tailor your content to grab attention exactly how you want. Speakers The built-in speakers offer high-quality sound, ensuring crystal-clear audio during multimedia playback. Cable Management Cables can be neatly tied and routed with the special cable clips, so they cannot come loose or move around.
