Description

Extended product overview

Elevate your visual communication with the LH5560UHS-B1AG and unlock the new possibilities for your business. This 500cd/m high brightness display is a powerful business tool that takes your marketing and communication efforts to the next level. With its Android 11 OS, iiSignage content management software, Signal FailOver and EShare features, this display offers a straightforward user experience, making content creation, management, and sharing a breeze. This ELED VA display consumes significantly less power compared to DLED IPS while maintaining the same level of brightness. Its versatile orientation, sleek design, and 24/7 reliability ensure it seamlessly integrates into any business environment. Whether it's used in retail, corporate, hospitality, or educational settings, the LH5560UHS-B1AG will undoubtedly captivate your audience and leave a lasting impression. ANDROID OS Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it. IISIGNAGE iiSignage is our digital signage content management platform to easily show and control your content and to manage your displays in a secure way. The Content Management System (CMS) gives you total control of your messaging and advertising remotely and safely. SIGNAL FAILOVER FailOver is a feature which automatically detects input sources. When there is no signal on the default input it will automatically switch to the next available input. FailOver allows customers to prioritize a number of inputs (incl. Browser, Media Player and Custom) and ensures your content is always actively displayed, assuring active content at all times. 4K UHD resolution (3840x2160), better known as 4K, offers a gigantic viewable area with 4 times more information and work space than a Full HD screen. Due to the high DPI (dots per inch), it displays an incredibly sharp and crisp image. MEDIA PLAYER Play your favourite music and show your most beautiful videos, photos and images directly on screen from a flash drive or internal memory with the built-in media player.
