## Description

Extended product overview

98" 4K UHD Professional Digital Signage display featuring Android OS, iiSignage and OPS PC slot Choose non-stop high performance and uninterrupted reliability with the ideal all-in-one signage solution for mission critical environments. This 500cd/m high brightness display featuring on-board Android 11 OS,iiSignage (Content Management Software), Signal FailOver and EShare offers a straightforward user experience, making content creation, management, and sharing a breeze. The OPS PC Slot provides an embedded PC option for total flexibility, security and control. WiFi enabled, the LH9875UHS is ready for remote content delivery using your network or you can choose to utilise LAN control. Its versatile orientation, sleek design, and 24/7 reliability ensures seamless integration into any business environment. Whether it's used in retail, corporate, hospitality, or educational settings, the LH9875UHS -B1AG will undoubtedly captivate your audience and leave a lasting impression. ANDROID OS Thanks to Android OS, you can easily customize the display to your needs by installing applications directly to it. IISIGNAGE iiSignage is our digital signage content management platform to easily show and control your content and to manage your displays in a secure way. The Content Management System (CMS) gives you total control of your messaging and advertising remotely and safely. SIGNAL FAILOVER FailOver is a feature which automatically detects input sources. When there is no signal on the default input it will automatically switch to the next available input. FailOver allows customers to prioritize a number of inputs (incl. Browser, Media Player and Custom) and ensures your content is always actively displayed, assuring active content at all times. OPS PC SLOT Built-in expansion slot supports the Open Pluggable Specification (OPS) standard; it simplifies the installation of a plug-in PC for digital signage applications. 4K UHD resolution (3840x2160), better known as 4K, offers a gigantic viewable area with 4 times more information and work space than a Full HD screen. Due to the high DPI (dots per inch), it displays an incredibly sharp and crisp image.
