Description

Extended product overview

15" Projective Capacitive 10pt touchscreen The ProLite T1521MSC-B2 15 touchscreen is based on projected capacitive technology, offering optimal seamless and accurate touch response. Due to its glass overlay, it guarantees high durability, scratch-resistance and perfect picture performance. A solid and steady base supports the touchscreen with an adjustable stand offering up to 70 degree tilt angles. Menu buttons are located on the back of the screen which can be locked to prevent tampering, and includes a handy function to deactivate the touchscreen for cleaning. The ProLite T1521MSC-B2 is an incredibly powerful touch solution, perfect for instore retail purposes.

>TOUCH TECHNOLOGY - CAPACITIVE This technology uses a sensor-grid of micro-fine wires integrated into the glass that covers the screen. Touch is detected because electrical characteristics of the sensor grid change when human finger is placed on the glass. Thanks to the glass overlay this technology is highly durable, and the touch function remains unaffected even if the glass is scratched. It offers perfect picture performance and will work with human finger (also latex gloved) and stylus-pen.

SCRATCH RESISTANCE Scratch resistance is essential for touch solutions used in public places and schools. This is achieved thanks to a glass overlay covering the screen. It guarantees high durability of the touch function and even more importantly the touch function remains unaffected even if the glass is scratched.

IP65 The IP code classifies and rates the degree of protection against water intrusion. IP65 means that the monitor is protected to water splashes against the enclosure from any direction.

SPEAKERS This LED monitor is equipped with two high quality stereo speakers.

VESA VESA mount compliance means you can easily mount the display to any mounting that complies with the VESA standard.
