Description

Extended product overview

Captivate your audience with the ProLite TE8604MIS-B3AG; a perfect solution for educational and corporate use. This 86" PureTouch-IR 20-point touchscreen with iiWare 9.0 (Android OS 9.0) is featuring Note, web browser, file manager, cloud drives, WPS office and ScreenSharePro. It comes with dual function touch pens, allowing users to annotate easily in 4K on files and on-screen content which can be saved directly to a USB device, 32GB internal memory or a selected cloud drive. The display supports playback of presentations, high-resolution video and almost any other type of content. Now with additional USB-C connection to support the latest in video, audio and touch signal via a single port and even charge your device with 65W power delivery. The high-quality commercial IPS LCD screen with a 4K UHD resolution (3840x2160), 400cd/m² and a contrast ratio of 1200:1 provide vibrant, detailed and high-quality images from anywhere in the class or meeting room. The anti-glare coating drastically reduces ambient reflection in high-brightness environments without compromising the sharpness and clarity of the image. The screen has a 24/7 non-stop operating time and is equipped with an all-metal bezel, 3mm thick hardened glass to ensure robust durability in high-use environments such as classrooms or meeting rooms. Share, stream and edit content from any device directly on screen and transform your team meetings or lessons into an easy, fast and seamless interactive session with the included WiFi module, ScreenSharePro and EShare app. PURETOUCH IR PureTouch-IR from iiyama delivers 1mm touch accuracy for the smoothest and fastest annotation. IIWARE iiWare 9.0 features Note, Browser, Cloud Drive and the option for you to sideload relevant apps you require for your organisation. IIYAMA SHARE Connect up to 9 devices and easily share, stream and edit content from your device to your interactive display and vice versa, back to your laptop, tablet or phone. iiyama Share supports AirPlay, Chromecast and Miracast. SECURITY Utilise Screen lock and USB passcode protection to ensure user security and the new Clean app will clear all data and passwords used. AG COATING The anti-glare coating is used in professional-grade displays to help avoid issues with reflections and external light sources affecting colour reproduction, contrast and sharpness. It also makes the screen less susceptible to dust, grease and dirt marks. 4K UHD resolution (3840x2160), better known as 4K, offers a gigantic viewable area with 4 times more information and work space than a Full HD screen. Due to the high DPI (dots per inch), it displays an incredibly sharp and crisp image.
