Description

Extended product overview

32" 12pt Open Frame PCAP interactive large format display The Full HD (1920x1080) TF3239MSC Open Frame monitor with slim borders is the ideal display solution for interactive shop windows, education, kiosks and in-store communications. The Projective Capacitive (PCAP) touch technology with 12 touch points ensures a seamless and accurate touch response. Thanks to the touch-through-glass technology it's possible to turn glass surfaces into touch-screens. It can be installed in landscape, portrait and face-up orientation for maximum flexibility and accessibility. With its AMVA3 LED panel, it offers exceptional colour performance, high contrast and wide viewing angles. Featuring a metal housing with a 60950-1 ball-drop proof, scratch-resistant, edge-to-edge glass, this display can be installed in the most demanding environments and build in different set-ups as a result of its Open Frame side mounting holes. For ease of integration, the TF3239MSC can be equipped with optional external mounting brackets (OMK4-4) making it an ideal solution for kiosk integrators and interactive multimedia.
