Description

Extended product overview

The XCB3497WQSNP is a 34-inch curved monitor that incorporates a KVM switch and a USB-C dock to simplify your workspace. The KVM switch enhances multitasking by allowing you to control multiple computers from a single monitor, keyboard, and mouse. The USB-C dock reduces cable clutter and simplifies connectivity even further, allowing a single cable to carry video, data, and power to charge your notebook. Additionally, when the monitor is connected to a LAN network, your notebook automatically gains network access. The VA panel technology delivers high contrast and deep black levels and wide viewing angles for consistent image quality regardless of your position for a richer and more vivid viewing experience. For optimal comfort, the 15cm height-adjustable stand allows you to customize the screen position, while the Flicker-Free panel and Blue Light reduction function help minimize eye strain.
