Description

Extended product overview

27 IPS technology panel with USB hub and 100Hz refresh rate Stylish edge-to-edge design makes the ProLite XU2792HSU perfect for multi-monitor set-ups. The IPS panel technology offers accurate and consistent colour reproduction with wide viewing angles. The 100Hz refresh rate together with FreeSync function provides an instant, tangible improvement in image smoothness. High contrast and brightness values mean the monitor will provide excellent performance for photographic and web design. Equipped with speakers, 2 port USB 3.2 hub, headphone socket, HDMI and DisplayPort connections, a blue light reducer function to reduce eye fatigue for optimal user comfort, make this 27 monitor a great choice for both multi-monitor configuration and office applications. **IPS TECHNOLOGY** IPS displays are best known for wide viewing angles and natural, highly accurate colours. They are especially suited for colour-critical applications. **100HZ A** 100Hz refresh rate translates into increased smoothness of the image. This means that flickering is reduced and therefore eye fatigue is also less noticeable. The increased frequency also means smoother transitions between contrasting colours, smoother motion scenes in both movies and gaming, and even reduced mouse cursor flickering. **SLIM LINE** Slim Line monitors feature a sleek bezel and are therefore particularly suitable for video wall or a multi-monitor set-up. **FLICKER-FREE + BLUE LIGHT** The ultimate solution for the comfort and health of your eyes. Flicker-free monitors with the blue light reducer function substantially reduce the strain and fatigue caused by flickering and blue light emittance of regular monitors. **SPEAKERS AND HEADPHONES** Playing with friends? Use the integrated high-quality speakers. Dont want to disturb anybody? Plug your headset into the headphone socket and turn the volume up.
