Description

Extended product overview

WQHD With true WQHD 2560 x 1440p resolution your monitor is ready to display high definition images. This means you can accommodate more information on your screen, i.e. over 76% more in comparison to a 1920 x 1080 monitor. **VA** VA panel technology offers higher contrast, darker blacks and much better viewing angles than standard TN technology. The screen will look good no matter what angle you look at it. **FLICKER-FREE + BLUE LIGHT** The ultimate solution for the comfort and health of your eyes. Flicker-free monitors with the blue light reducer function substantially reduce the strain and fatigue caused by flickering and blue light emittance of regular monitors. **SPEAKERS AND HEADPHONES** Playing with friends? Use the integrated high-quality speakers. Dont want to disturb anybody? Plug your headset into the headphone socket and turn the volume up. **ACR** Contrast Ratio is a measurement of the difference between the darkest black and the brightest white your monitor can display. **Advanced Contrast Ratio** is a feature that automatically adjusts contrast and brightness of the screen to assure perfect picture quality while watching films and playing games.
