Description

Extended product overview

The Full HD (1920x1080) TF3239MSC Open Frame monitor with slim borders is the ideal display solution for interactive shop windows, education, kiosks and in-store communications. The Projective Capacitive (PCAP) touch technology with 12 touch points ensures a seamless and accurate touch response. Thanks to the touch-through-glass technology it's possible to turn glass surfaces into touchscreens. It can be installed in landscape, portrait and face-up orientation for maximum flexibility and accessibility. With its AMVA3 LED panel, it offers exceptional colour performance, high contrast and wide viewing angles. Featuring a metal housing with a 60950-1 ball-drop proof, scratch-resistant, edge-to-edge glass, this display can be installed in the most demanding environments and build in different set-ups as a result of its Open Frame side mounting holes. For ease of integration, the TF3239MSC can be equipped with optional external mounting brackets (OMK4-4) making it an ideal solution for kiosk integrators and interactive multimedia.
