### Description

Extended product overview

Smart portable ultra short throw projector Powered by Google TV, a built-in battery, and advanced RGB triple-laser technology, this tiny yet powerful projector delivers bright, portable, big-screen entertainment at the touch of a button. Featuring the latest RGB laser technology, the Photon Go provides stunning 150% DCI-P3 cinema-grade colour accuracy for up to 20,000 hours of vibrant, uninterrupted viewing - and with Google TV at your fingertips, you can dive straight into your favourite apps and shows, right out of the box. This projector's lightweight and travel-friendly design comes with a built-in battery for up to 1.5 hours of wireless media playback<sup>1</sup> or up to 4 hours of music playback in Bluetooth speaker mode - So you catch the latest episode of your favourite tv show, game with friends or relax with your go-to playlist long into the evening, all wirelessly and on-the-go, or in the comfort of your own home. With an ultra-short throw lens and innovative Time-of-Flight (ToF) technology for auto keystone and focus correction, you can instantly create a perfectly projected 100" image less than 25cm away from your desired projection surface - ideal for quick and casual viewing. Featuring 2x 10W speakers and supporting Dolby digital audio, you can enjoy your favourite movies and music with rich detail and immersive surround sound, adapting to your setup to deliver superior audio that elevates your viewing and listening experiences. Features Full HD cutting-edge RGB triple laser technology Vibrant colour and cinema grade detail with 150% DCI-P3 Ultra portable design with built-in battery for up to 1.5hrs of content playback Use anywhere, simply point and play Google TV & Google Assistant Smoothly navigate and stream your favourite films and shows. Netflix, Disney+ and access to thousands of apps via the Google Play Store Auto keystone and focus Automatically adjusts for a clear, sharp and perfectly straight image Entertainment you love. With a little help from Google. Access your favourite apps, stream your favourite movies and shows and get curated recommendations with built in Google TV. Freedom of space with ultra-short throw Optimise your space and enjoy amazing big-screen experiences with an ultra short throw lens that casts up to 100-inch images when placed just inches/ cm away from the projection surface. Triple RGB Laser Triple RGB laser technology offers exceptional color vibrancy with a wider, more accurate spectrum. Its three-laser system enhances contrast, depth, and brightness, delivering an immersive, lifelike viewing experience for movies on the go. BT.2020 Colour Accuracy Discover vibrant color with 110% BT.2020, offering a wider range of rich, lifelike hues for unmatched clarity and realism. Perfect for movies or creative work, enjoy deeper reds, brighter greens, and vivid blues that bring your content to life. Auto keystone and focus correction Auto keystone automatically adjusts the trapezoid effect when the projector is off-axis or the desired projection surface is not perfectly flat to create a perfectly aligned image within an instant. \*Auto keystone adjusts misaligned images up to +/- 10 degrees horizontally and +/- 5 degrees vertically. Up to 1.5 hours of Wireless playback Built in battery for up to 1.5 hours of wireless media playback or up to 4 hours of music playback in Bluetooth speaker mode. Wireless Freedom Boasting a super portable, lightweight and battery integrated design, you can take the big screen from the
