Description

Extended product overview

Get Awed by Details Immerse yourself in meticulously enhanced contrast and true-to-life colours within expansive game worlds. Experience more AAA open-world in-game detail and 4K HDR viewing for total immersion and heart-pounding, awe-inspiring realism. Spatial Audio for Precision Gaming: Sense every in-game shift through pinpoint sound placement, from explosive blasts to tranquil moments. Transform into a Game Battlefield Effortlessly transform your bedroom or small living room into a gaming space with the X500i immersive gaming projector. Featuring 2200 ANSI lumen high brightness and a short-throw design suitable for dimly lit compact rooms, the X500i is perfect for projecting large images even in compact spaces. Confined Space Flexible Projection with a throw ratio of 0.69~0.83 and 1.2x zoom, you can customize screen sizes to fit various spaces effortlessly and project a captivating 95" screen from just 1.44m for expansive entertainment viewing. All without the hassles of complicated installation. Digital Zoom Embrace a wider view and effortlessly resize the projected image thanks to digital zoom. All-encompassing gaming is now showing right in front of you without any blind spots or view-compromised angles. *Note: digital zoom may impact input lag. Tailored for Every Game Type Customized visual and audio tuning for different game genres delivers better gaming experiences and enhanced sensory immersion. Game Modes with Lowest Input Lag Ultra-fast 4.16ms low input lag in Game modes conveys your sight, hearing, and thoughts into action with zero delay. RPG Mode: Dive into cinematic realism with deep bass SPG Mode: Amplified excitement with true colours and clear vocals FPS Mode: Detect threats fast with enhanced dark detail and clear audio Auto Game Mode for All Consoles BenQ's Auto Game Mode effortlessly identifies Xbox, PlayStation, and Switch console inputs, instantly recalling your previous game mode settings for a tailor-made gaming experience. Precision Enhanced with FPS Crosshair The FPS Crosshair feature projects a targeting reticle onto the screen, empowering players to swiftly and accurately lock onto adversaries in ever-challenging battles. BenQ Setting Xchange Download expert projector image settings for top games and experience gameplay through the eyes of pros thanks to ready-made celebrity profiles. Share your projector image settings with fellow gamers to help them level their experiences, or import theirs. Experiment and find your best profile with this intuitive utility!
